

Hand Pulls

Designed to be mortised into the edge of timber sliding doors or surface mounted onto alloy or steel stiles. This product range is available in two options depending on the door situation.

The handle ejects from the engaged position by pushing the button releasing the catch. The handle is returned to the closed position by pushing back into the case until the catch is engaged.

- *Narrow design to suit slim doors (38mm plus)*
- *Solid brass construction and stainless steel componentry*

Hand Pull - Narrow 1512

Hand Pull - Narrow - Extended 1520
