

Flush Pulls - Deep & Offset

This product has been designed to provide a contemporary flush pull system for primarily hinge and bi-fold doors.

The enhanced depth will allow for fingers under the lip to get enough grip. The offset version is recommended for larger heavier doors as this has a larger lip by offsetting the pocket.

- Designed & manufactured in New Zealand
- Concealed Fixing
- Pocket sizes to match locking setups
- Solid brass construction
- Deep & Offset versions available

Ordering

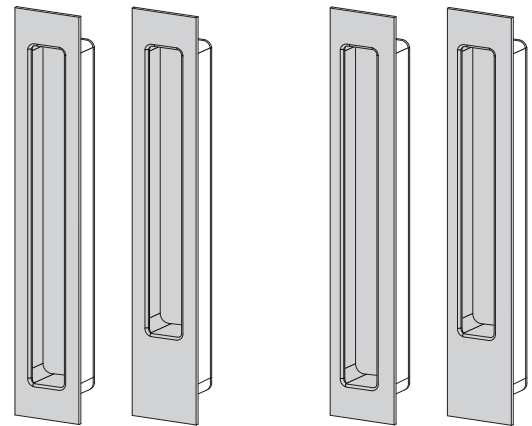

- 1 Select product e.g 1261 - L - 4
- 2 Specify profile on order form P1 - P3. Code becomes 1261 - L - 4 (P1)

Note: Offset flush pulls are handed, handing information will be required when ordering
