

Flush Pulls - Semi Deep & Offset

This product has been designed to provide a contemporary flush pull system for primarily hinge and bi-fold doors.

The slightly enhanced depth will allow for fingers under the lip to get enough grip. The offset version is recommended for larger heavier doors as this has a larger lip by offsetting the pocket.

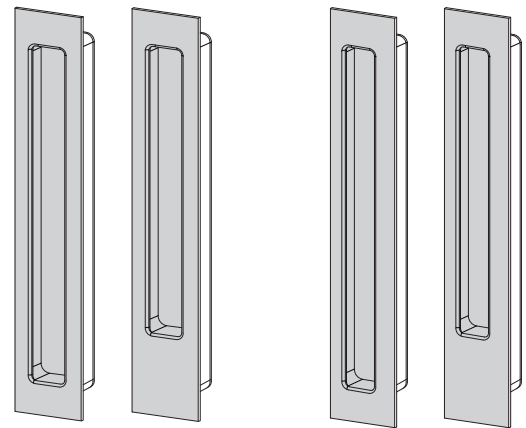

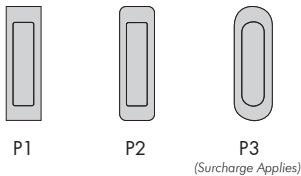

- Concealed Fixing
- Pocket sizes to match locking setups
- Solid brass construction
- Semi Deep & Offset versions available

Ordering

- 1 Select product e.g 1161 - L - 4
- 2 Specify profile on order form P1 - P3. Code becomes 1161 - L - 4 (P1)

Note: Offset flush pulls are handed, handing information will be required when ordering
