

VS Locking Flush Pull Flexible Backset Technical - Timber

Flush Pull Slide Adjustment

Central hole is the standard back set position
The side holes provide LH /RH adjustment.

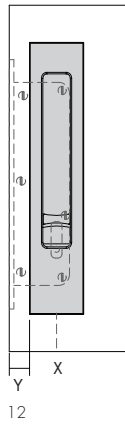

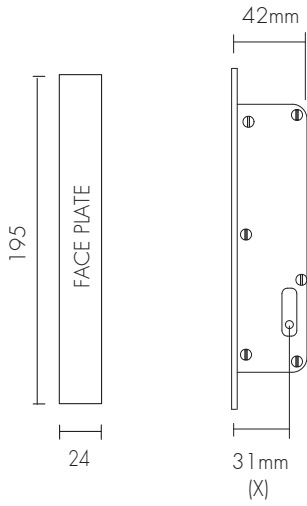

No Locking Bar Adjustment
- Fixed back set position

Flush Pulls can be positioned Left to Right depending on the flush desired location.

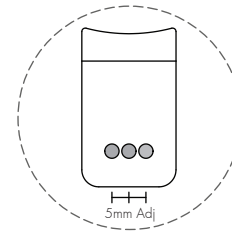

Note: 'Y' is based on flush pull being positioned on standard backset 'X'. Using the adjustment will affect the position to the edge of the door.

31 Back set (31BS - A) 30mm wide Flush Pull (Window only)

- Consider:
- Depth of glass
 - Window jamb
