

Mortise Deadbolts Interlocking

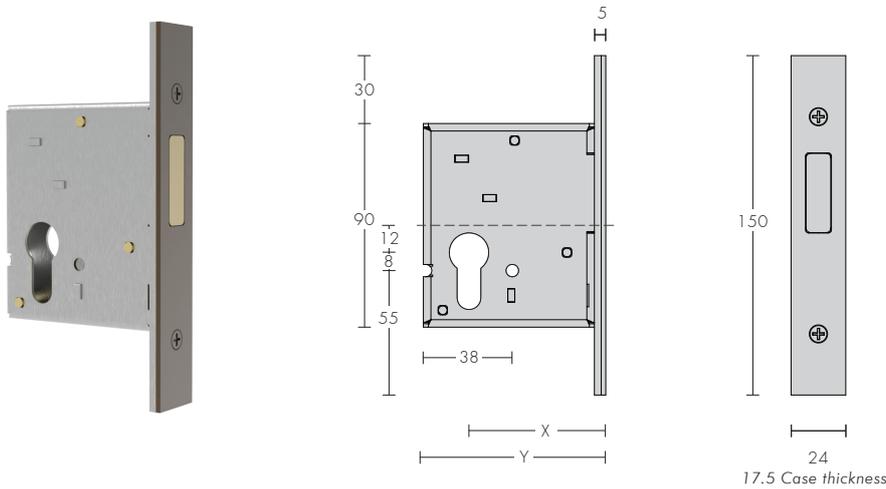

Mortise deadbolt interlocking products have been designed for all door types including narrow stile and allow for a consistent back plate length across the various functions of a project.

The magnetic interlocking mechanism prevents the bolt from being thrown unless the door is in the closed position for the strike to release the bolt

Designed and manufactured in New Zealand from 316 grade stainless steel and brass for corrosion resistance.

- Single turn, 15mm bolt throw
- 8mm square spindle hub
- Lock only operable with door is in the closed position

(A protruding latch bolt is not possible when the door is away from the strike in the open position)

Privacy Turn Function (P)

These have an 8mm square hub fitted in place of a profile cylinder.
