

# Mortise Locks - Key Entry

Mortise lock products have been designed for all door types including narrow stiles. These are best suited to be used in conjunction with pull handles or fixed lever products.

Key Entry locks function by retracting both the latch tongue and the bolt when operated with the key. The addition of a turn allows the function to be modified to reflect access requirements.

- Reversible latch bolt for LH or RH hung doors
- 72mm centers (Pitch)
- Single turn, 15mm bolt throw
- Minimal lever handle rotation of 40°
- 8mm square spindle hub

## Standard

- 1000 - 60
- 1000 - 70

Backset X	Case Depth Y	Horizontal Fixing Centers
60	82	38 - 41mm
70	92	38 - 41mm

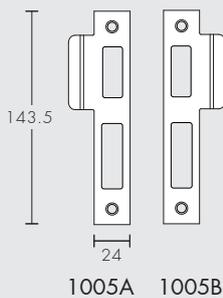

## Strikes Options

All strikes include strike dust boxes

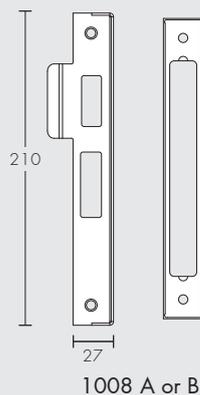

Strikes are handed to allow the lip to wrap around the edge of the jamb.

Standard strikes measure 20mm from the lock centre-line to the bend of the 10mm lip.
